Not Be Combined.Q: Appending new
arrays in JSON I have some issues when

append data using jQuery For example, This is the JSON value when there is no data yet. { "query1":[], "query2":[], "query3":[], "query4":[] } Then the user clicks the button and data is appended into the JSON. (After the button is clicked, the JSON value is updated as follows) { "query1": ["Vijay","Sudhir"], "query2": ["Ram","Abby"], "query3": ["Hemanth"], "query4": ["Gopal"] } And then the user clicks the button again. This time, after the button is clicked, the JSON value is updated as follows { "query1": ["Vijay","Sudhir"], "query2": ["Ram","Abby"], "query3": ["Hemanth","Gopal"], "query4": ["Gopal"] } and so on. Everytime when

I append data to the JSON I have the below issues.

```
var query1= $("#query1").find("option:selected").text(); // VJ
var query2= $("#query2").find("option:selected").text(); // Ram
var query3= $("#query3").find("option:selected").text(); // Hemanth
var query4= $("#query4").find("option:selected").text(); // Gopal
var query_all = { query1: [query1], query2: [query2], query3: [query3], query4: [query4] }
console.log(query_all.query1) // VJ
console f678ea9f9e
```
